

PS #10

AUTONOMOUS MULTI-AGENT INVESTMENT COMMITTEE

SPOC – Yashs

AUTONOMOUS MULTI-AGENT INVESTMENT COMMITTEE (1/1)

Objective

- ❑ **Build an Autonomous Multi-Agent Investment Committee** that performs **real-time intraday paper trading** on the Indian stock market (NSE/BSE). Starting with **₹10,000 virtual capital** and **1:2 leverage**, the system must autonomously **BUY, SELL, HOLD, WAIT, or SWITCH** stocks to **maximize end-of-day net profit (after all trading costs)** through explainable multi-agent reasoning.

Mandatory: Directional Confidence-Aware Consensus

Simple majority voting or confidence averaging **is not allowed**.

The final decision must use a **Directional Confidence-Aware Consensus**, where each agent's influence dynamically depends on:

- Confidence
- Expertise
- Historical reliability
- Trust
- Context relevance
- Agreement / disagreement with other agents

Every trade must clearly explain **why the consensus reached its decision**.

AUTONOMOUS MULTI-AGENT INVESTMENT COMMITTEE (2/3)

Mandatory AI/ML Tools

Each team must build **custom AI/ML-powered financial tools** (can also use API in an integrated manner and not solely APIs), such as:

- Technical Indicator Engine
- News & Sentiment Analysis
- Time-Series / DL Forecasting
- Fundamental Analysis
- Policy & Geopolitical Impact
- Sector Intelligence
- Opportunity Discovery
- Risk Prediction

Per Trade Output

Every **BUY / SELL / HOLD / WAIT / SWITCH** must report:

- Agent-wise Recommendations
- Directional Confidence Score
- Consensus Verdict
- Reasoning & Evidence
- Alternative Stocks Considered
- Critic Feedback
- Expected Risk & Return

Final Output (End of Trading Session-> 4 - 6 hours)

- Final Portfolio Value
- Net Profit (after brokerage, taxes & charges)
- Portfolio Growth
- Trade History
- Explainable Reasoning for every trade & no-trade
- Complete Decision Log

Trading Rules

- **Market:** NSE/BSE (Intraday)
- **Virtual Capital:** ₹10,000
- **Leverage:** 1:2
- Paper Trading (4–6 Hours)
- All positions closed before market close
- Profit calculated after realistic trading costs

AUTONOMOUS MULTI-AGENT INVESTMENT COMMITTEE WITH DIRECTIONAL CONFIDENCE CONSENSUS

Research AI Workflow, Multi-Agent Financial Consensus Based on Directional Confidence
